

The success of ATIC lies in the efficient co-ordination between ATIC and the different production Centres under the KAU. The various planting materials, bio control agents and value added products are procured from the production Centres. Payments to these Centres are met from the revolving fund. From every invoice supplied from the production Centre, upto 8% of the amount is deducted towards service charges for handling the articles at the Centre. Saleable technologies/products are collected from the production Centres located in different parts of the state.

Arrangements have been made to ensure uninterrupted supply of quality planting materials, seeds, publications and value added products for sale to the visiting farmers. The list of production Centres supplying technologies to ATIC.

1. Agricultural Research Station, Mannuthy
2. Agricultural Research Station, Chalakkudy
3. Agricultural Research Station, Thiruvalla
4. Agricultural Research Station, Anakkayam
5. Aromatic and Medicinal Plants Research Station, Odakkali
